## To Do:

- Consider adding a week overview, to even more easily see when to do what (optimal if there are many exercises in workout plan)
- Edit weight units in settings
- Add option for creating an account
- Store data in a better way
- Add workout plan catalog so users don't have to create their own if they don't want to
- Add exercise catalog, so that it makes sense to have the autocomplete function for exercises

## Done:

Theory:

- Create report
- PACT
- Navigation Map
- Affinity Diagram
- Rich Picture
- Conceptual Model
- Interview 1
- KLM
- Interview 2
- Personas
- Scenarios
- Story Board
- Workmodelling
- Evaluation interview

Prototype:

- Create initial specification for the prototype
- Decide how to make the prototype
- Create low-fidelity prototype
- Setup project for high fidelity prototype
- Create basic app structure to match navigation map
- Add vueify bottom bar for navigation
- Workout input view
- Workout view
- Main feed
- Data view
- add delete button for workout plan exercises
- add feedback when recording a workout
- add option for selecting kilograms or pounds for weight
